## HAZEMAG-Hammers – 3<sup>rd</sup> Generation

### 1<sup>st</sup> Generation

This hammer is cast in one single material and partially hardened in a special heat treatment process.

### 2<sup>nd</sup> Generation

The modified shape increases the wear mass and is produced as a composite cast.

### 3<sup>rd</sup> Generation

All Advantages at a Glance:

- Our latest hammer design is made of an improved composite-cast.
- The innovative shape increases the wear mass by additional 10 % with a consistent total weight in comparison with the 2<sup>nd</sup> hammer generation.
- Thanks to the improved quality and the new shape, increased lifetime results are achieved!

**All in all. The optimum hammer for you.**
